# Company Profile

■ Profile

Established in 1990, SYRIS Technology Corp., a Taiwan-based company is with over 15-year experience in Access Control System. We have accumulated a lot of technology and owned a strong RD team and manufacturing power in this field. Besides access control system, with the core competence of RFID technology, SYRIS is the first Taiwan-based company not only to complete the various Active RFID products but also start the mass production of active RDIF products this year.

SYRIS is proud of the innovation of the long range active RFID systems. We have designed high-performance, low-cost active RFID tags and readers that accurately identify, locate and track physical assets, information and personnel. These solutions incorporate patented innovations to provide high functionality at the lowest cost in the industries, including manufacturing, logistics, healthcare, livestock, state and local government….etc.

- The internet of things
- Personnel / Vehicle Access Control
- Parking Lot management
- Fleet Monitoring
- Inventory Management
- Container & Pallet Tracking
- Manufacturing Line Management
- Skids and Bins Tracking
- Body Temperatures of Patients and Babies Monitoring
- Temperature / Humidity / Sunshine Monitoring
- Personnel Tracking at Oil Rig & Mining
- Personnel & Asset Tracking in Hospital
- Prison Inmate Tracking
- Tourist Group Tracking
- Conference Personnel Tracking

MADE IN TAIWAN

SYRIS is your one-stop-shop for a total RFID solution. We understand that your RFID requirements are changing rapidly as technology advances and improves. We focus on your needs to deliver integrated, cost effective RFID systems and applications that increase your efficiencies and bottom line profits.

Actively sense, identify, locate your assets and people anytime, anywhere....

■ The key benefits of choosing our company for your RFID projects are:

- Our strength to grasp and understand all elements of RFID.
- Our deep experience with RFID technologies.
- Our ability to provide a total RFID solution including tags, readers, antennas and middleware.

Our Active RFID solution encompasses the various product lines called "Xtive" as bellows.

- Types of 2.45 GHz Active RFID Readers
  Standard reader with USB interface
  Ethernet reader
  CF card reader- inserted into PDA as handheld reader
- Types of 2.45 GHz Active RFID Tags
  Tag with/without button
  Name card sized tag
  Wristband tag

The SYRIS approach can offer the following benefits :

Extended Read Range
The read range of a single RFID reader can cover the distance over 50 meters in open space.

Multi-Tag Capability
Our tags employ anti-collision logic to assure each tag's information is read, even when multiple tags are attempting to transmit concurrently.

Compact Low-Cost Design
Our state-of-the art design brings you the advantages of RFID technology, combined with long life and low cost.

Simplified Installation
Our wireless device attachment capability simplifies the installation and interconnection.

The Active RFID Total solution Provider
